

MCRA Assists Evaheart's Pivotal COMPETENCE Trial in Support of the EVAHEART®2 LVAS

Client Need

Evaheart approached MCRA to provide ad hoc clinical consulting and monitoring services to serve as an extension of the Evaheart team. Through the initial scope of work, Evaheart invited MCRA to provide a more full-service approach to the pivotal study, including data management, CEC and DSMB administrative support.

"Our team initially contracted with MCRA for consulting work then went on to contract with MCRA as a CRO. MCRA consultants are knowledgeable, reliable and consistent. The team has been a pleasure to work with and has really guided our team to become more structured and confident."
